# EIGHT (8) WAYS TO PREVENT IDENTITY THEFT AND CYBER ATTACKS

1. Regularly install and use updated anti-virus and anti-spyware.

2. Use a firewall for your internet connection.

3. Download and install software updates as soon as they are available.

4. Secure your WiFi connection.

5. Use a password manager.

6. Use phrase passwords.

7. Never store personal information including credit card information on your phone or PC.

8. Change your PIN on your credit card regularly.
